

Waste Management

By: Armando E. and Alexis H.

Recycling

- Recyclable plastics #'s 1, 2, and 5
- Cans and aluminum
- Cardboard
- Glass jars and bottles
- Paper

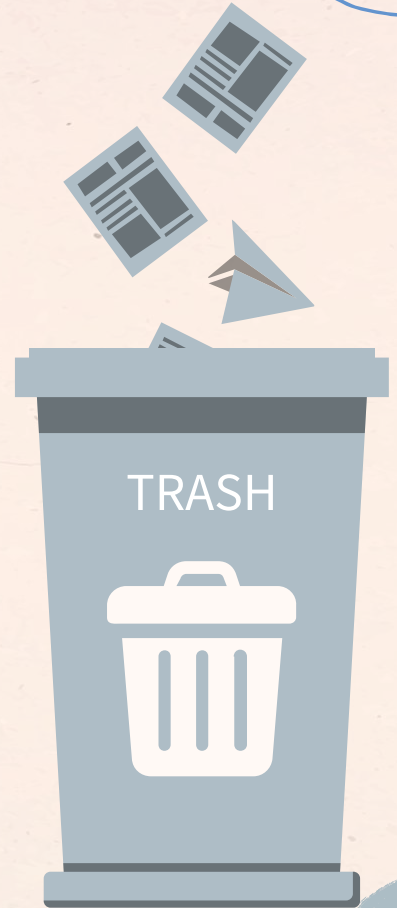

Organics

- Plant matter
- Tree trimmings
- Bread and grains
- Wood
- Fruits and vegetables
- Cardboard and paper with food
- Meat and poultry

Trash

- Waste that is not recyclable nor Organic
- Styrofoam
- Clothes
- Bathroom waste
- Plastic food containers
- Succulents and cacti
- Other small random waste

Non disposable or Special waste

- Large objects
- Motor oil/Car parts
- Batteries/Any electronic waste
- Syringes/Medicine
- Thermometers
- Almost any kind of chemicals
- Stones
- Sharp objects

Electronic waste

E-waste is quickly becoming one of the most important parts of recycling accounting for around 14 million tons of recycled materials

- Dumping of E-waste causes toxic material to leak into soil
- E-waste often contain many valuable resources in it
- Like all parts of recycling E-waste has both the good and darker side to it

Recycling e-waste - Good for the business
and the environment - DW documentary
The video shows what people are doing to deal
E-waste, a type of waste that requires a special method
to process

The good of Recycling

In the video we see many ways that people nowadays are working to improve E-waste recycling

- Solar panel recycling and reusing in germany
 - 70% of thrown away solar panels are reusable and the rest can be recycled
- Improving working conditions for people harvesting materials
 - Setting better conditions for e-waste recycling worker in india
- Comown - renting devices and benefits
 - a new business model that promotes durability and sustainability

The dark side of electronic recycling - Verge Science

In this video we learn about BAN, a nonprofit organization and what they do to expose the darkside of electronic recycling

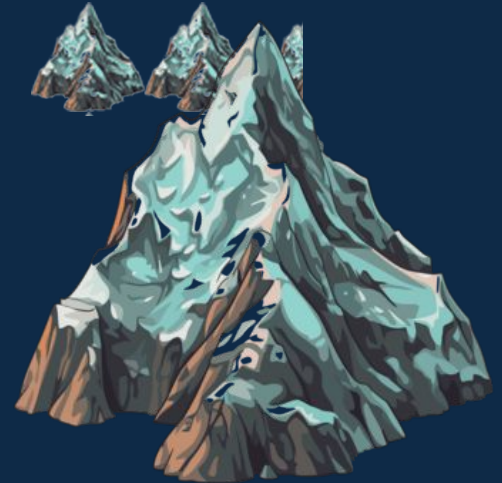

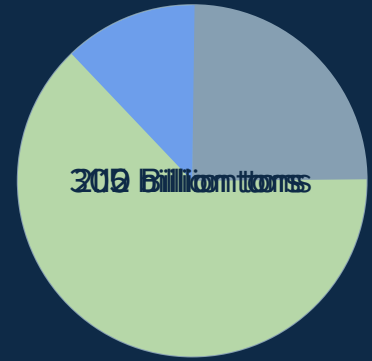

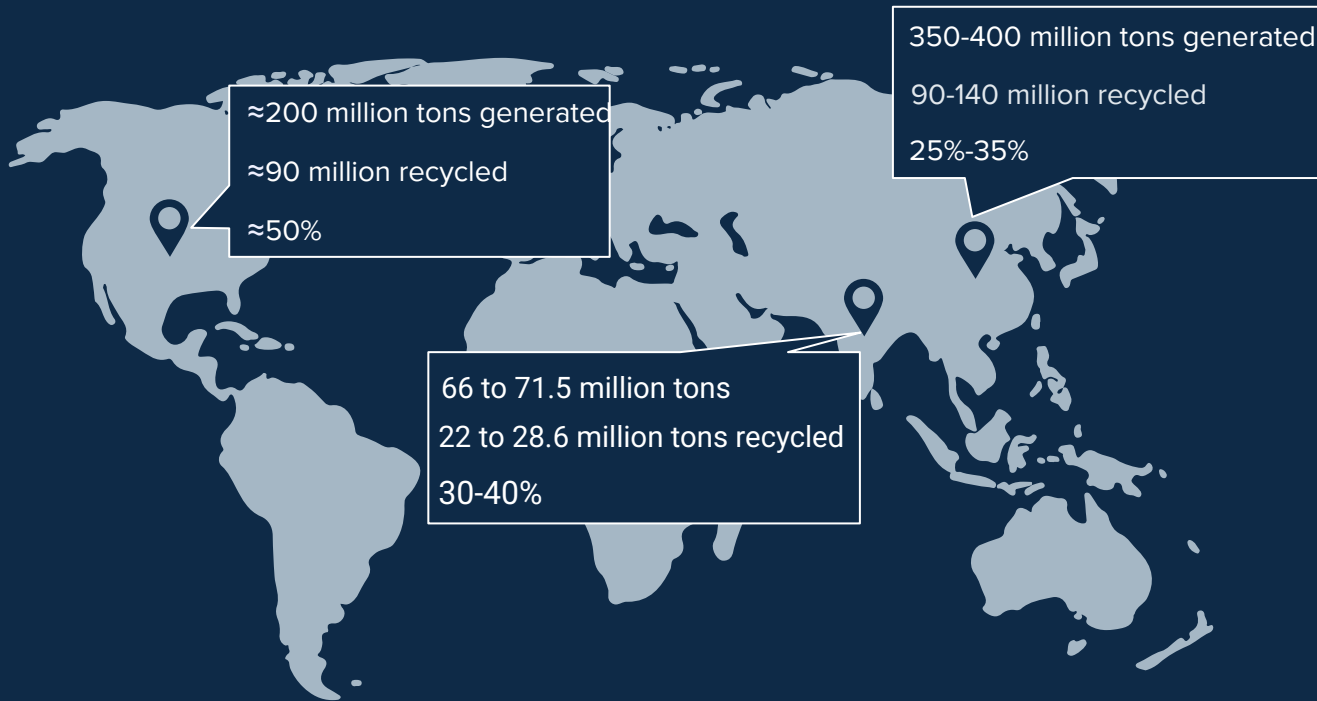

The dark side of recycling

Just in the short clip of the video we see the some of the problems that E-waste recycling has

- Foreign exporting of waste
 - what happens to the things we send to recycle
- What BAN has to do
 - Their work and what they hope to do
- What can be done to prevent it
 - Legal actions are weak and can be improved

How much we waste

What can you do

Reduce

- Buy smart, think about what your buying
- Reduce food waste, only buy what you'll eat
- Be aware, best to cut down on single use plastics

Reuse

- Buy used, thrift shops
- Use reusable options, water bottles, straws, and bags
- Donate old clothes and food you didn't eat

Recycle

- Recycle properly, make sure what your recycling can be
- Take proper step to dispose of special waste
- Remind yourself to recycle, a sign or bin can work
